Tadvidya Sambhasha Ayurveda X

National Medical Seminar on AYURVIDYA or AYURVEDA INFECTIONS

Saturday, 10th October 2015, Nehru Science Centre, Worli, Mumbai

It gives me a great pleasure in announcing this annual seminar in Ayurveda for the tenth time in row. This time there are two themes with a dedicated session for each of the themes.

1. Ayurveda or Ayurvediya

Term Ayurvediya was coined by one of our legendary Indian scholar, patriot and freedom fighter Lokmanya Tilak. His idea was that the modern medicine at that time appeared to give better results in conditions, e.g., malarial fever with discovery of quinine. He was of the opinion that supplementation of modern developments in sciences to Ayurveda would be ideal. In short he was a pioneer in advocating integrative approach to the practice of medicine.

2. Infections

Today's serious challenge is the growing resistance to Infection. This seminar will dwell on short comings in current modern treatment approach and the emerging role of Ayurveda.

I am happy to announce that this seminar will be inaugurated by a renowned scholar in Ayurveda and Sanskrit language,

“PADMASHRI” PROF. (DR.) OM PRAKASHJI UPADHYAYA
Hon'ble Vice-Chancellor of Punjab Ayurvedic University

Many eminent clinicians, scholars will provide intellectual feast.

Dr. Palep's Medical Education and Research Trust warmly welcomes you and request you to register your name.

Thanks
Dr. H. S. Palep
